## EXECUTIVE SUMMARY

I am currently pursuing a **Diploma in Fullstack Web Development**. Looking forward to a career transition to ICT particularly to **Web Development (Frontend) / Web Design**. I have recently started my coding journey; However, I am keen to learn on the job and have many transferable **soft skills** acquired in my previous working experiences, as Functional and Data Analyst, like **flexibility, teamwork, communication and attention to detail**.

I have already finished my first milestone **project**, part of the course mentioned above, a static (front-end only) website for a band, using the technologies learned throughout the course such as **HTML5, CSS3, Bootstrap, UX** principles, **wireframes design** as well as documentation.

Eager to start immediately as my course is online and allows to study at any time.

## CAREER HISTORY

---

**Financial Data Analyst for Bloomberg**  
at Infosys BPO, Dublin (Ireland)

**October 2017- May 2018**

- Performed financial statements analysis and further adjustments in order to provide normalized financial statements, industry-specific data point and in particular cases geographic segmentation data
- Maintained, improved and deliver accurate, high-quality information for the Client terminal on a timely basis
- Ensured that consistency and quality requirements were met

**Junior Functional Analyst for Vodafone**  
at Aubay S.p.A., Milan (Italy)

**December 2016 - July 2017**

- Functioned as the primary liaison between the client and the development team working on a Web Application following the Agile methodology

- Gathered and documented client requirements, business needs and project objectives via weekly feedback sessions and client meetings
- Performed **data analysis** using **SQL** and **Excel**
- Oversaw the development of the product as per specifications and deadlines
- Assisted with **User Acceptance Testing**
- Helped design and implement end user training materials
- Reported bugs and interacted with the software development team to resolve issues

**Functional Analyst Intern**  
at **Aubay S.p.A.**, Milan (Italy)

**June 2016 - December 2016**

- Worked as part of a team working on a Web Application specifically designed for the client in a very fast paced and dynamic environment
- Acted as the primary liaison between the client and the development team
- Gathered and documented requirements
- Performed data analysis

## EDUCATION & TRAINING
